Due to many contributing factors, the Diagnostic Imaging Department is experiencing a large amount of back log. PSFDH anticipates that these concerns will be resolved in the near future.

Similar to the triage process in the Emergency Department, the Diagnostics Imaging Team (DI Team) receives and reviews all test requests and requisitions to determine level of urgency. **The DI Team always sets aside time to support inpatient and urgent test requests.** If you are concerned about the wait time for your appointment, please contact your primary care provider for more information.
